

Total Digital Security for High-Profile Leaders

Prevent executive impersonation, data exposure, and targeted fraud.

How Executive Protection Works

Doppel Executive Protection detects and disrupts impersonation threats and personal data exposure targeting high-profile individuals. This includes fake profiles, cloned phone numbers, deepfake videos, and leaked personal information across the open web, social platforms, fringe apps, and the dark web.

PII & Credential Monitoring

Scans 24/7 for personal data leaks and sensitive exposure.

Campaign Correlation

Links individual threats to broader attack infrastructure.

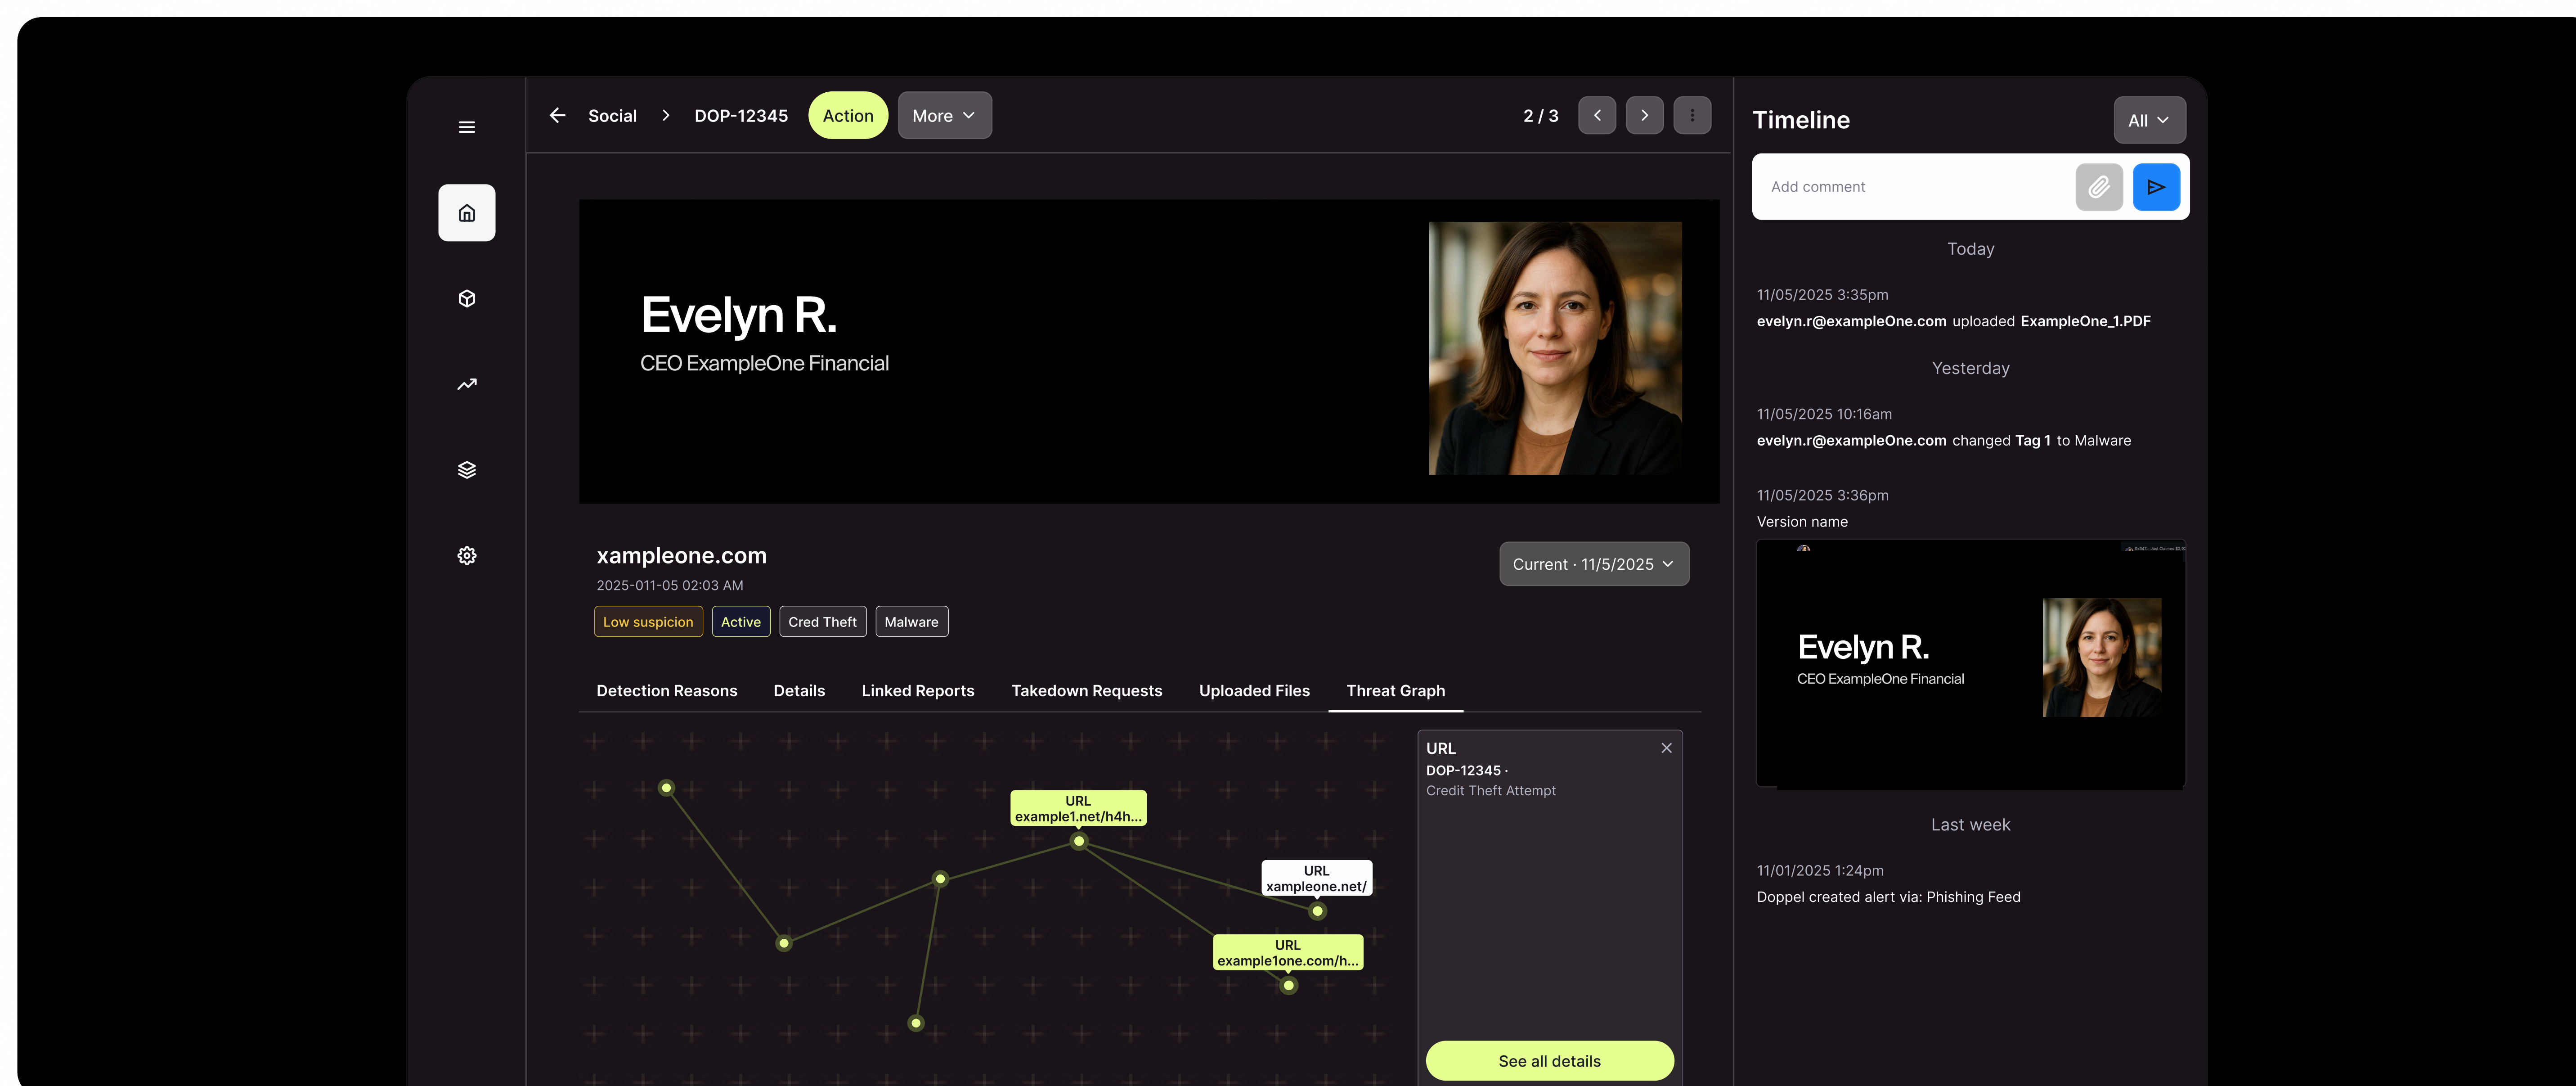

Cross-Channel Threat Detection

Finds impersonations and deepfakes on mainstream and fringe platforms.

Automated Enforcement

Removes fake accounts, takes down domains, and cuts off phone/SMS scams.

Why Choose Executive Protection

- ✓ Safeguard executive identity and credibility.
- ✓ Prevent fraud and harassment from leveraging executive personas for infiltration.
- ✓ Implement without requiring intrusive participation from the executive.
- ✓ Reduce legal and reputational risk for the organization.

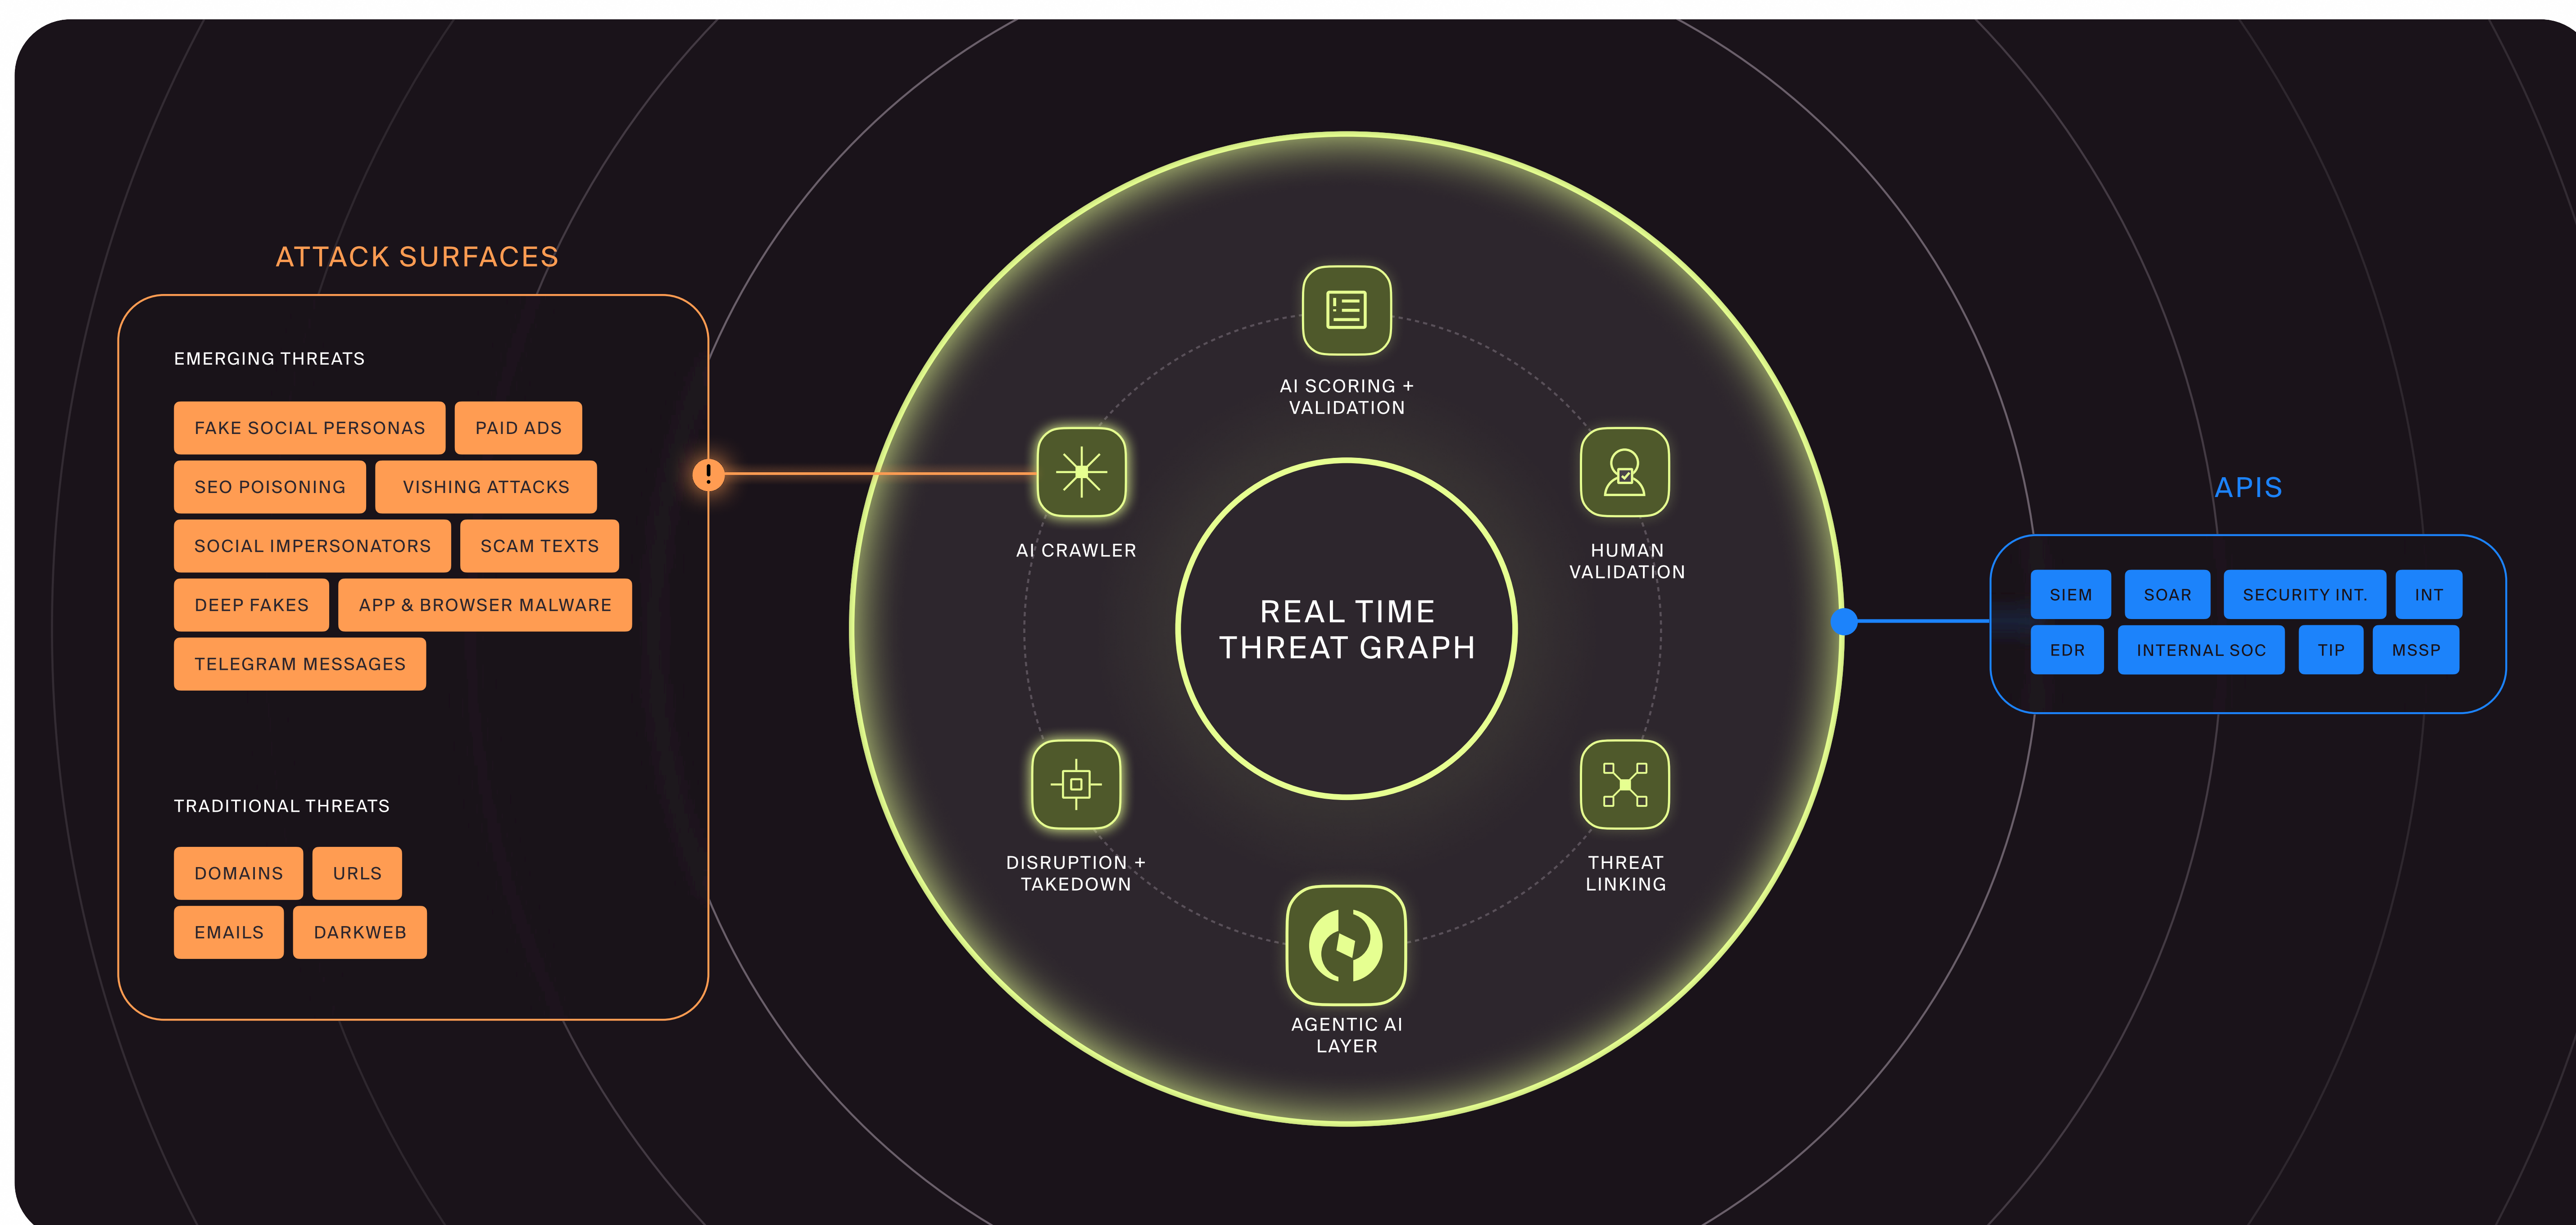

Powered by Doppel Vision

Prevent executive impersonation, data exposure, and targeted fraud.

We connect the dots between attacker infrastructure, TTPs, and active campaigns – building a threat graph to show the whole scam, not just the symptoms.

The Result:

- ✓ Faster Takedowns
- ✓ Reduced Attacker ROI
- ✓ Proactive Defense

Doppel protects people and brands from AI-powered impersonation, fraud, and social engineering. We don't just detect threats, we dismantle the attacker's infrastructure across every channel it touches.

- ✓ Feedback loop → threat graph learns from every takedown
- ✓ Multi-channel signal ingestion
- ✓ Automated enforcement across registrars, telcos, ad networks, platforms
- ✓ Cross-surface correlation into unified threat graph
