

Threat Graph Intelligence: Reports & Insights

Campaign-level visibility and decision-grade intelligence for enterprise risk reduction

Turn Signals Into Strategy

Threat Graph Intelligence extends Doppel Digital Risk Protection with expert-led analysis and in-product campaign visibility, helping organizations understand not just individual detections, but the full scope and business impact of threat activity.

Built for both operators and executives, Threat Graph Intelligence transforms fragmented signals into actionable intelligence and measurable risk reduction

Threat Graph Insights

Enables faster validation, coordinated takedown, and accelerated remediation. In-product campaign visibility and investigation-ready traceability for SOC and IR teams.

- ✓ Campaign maps and timelines
- ✓ Linked entity analysis
- ✓ Hosting and infrastructure forensics
- ✓ Ready-to-use IOC bundles
- ✓ Visual asset tracking

Threat Intelligence Reports

Designed for targeted, high-impact analysis when leadership needs clear, defensible answers. Focused, analyst-authored deep-dive investigations tailored to your organization.

- ✓ Evaluates campaign risk by business impact
- ✓ Translates findings into a CISO-level roadmap
- ✓ Maps attacker infrastructure, TTPs, and reuse patterns
- ✓ Prioritizes remediation and control investment

Trusted by

Executive Strategy Briefings

Designed for executive alignment and long-term enterprise risk reduction. Enterprise-level strategic visibility across all brands and subsidiaries.

- ✓ Consolidated parent-level campaign reporting
- ✓ Senior analyst insights and recommendations
- ✓ Portfolio-wide risk prioritization
- ✓ Broad-ready narratives and remediation roadmaps

How it Works

We connect infrastructure, TTPs, and active campaigns, turning operational intelligence into strategic direction. Threat Graph Intelligence builds on Doppel's graph-driven defense model:

- ✓ Cross-channel signal ingestion
- ✓ Threat graph correlation into unified campaigns
- ✓ Analyst investigation and validation
- ✓ Board-ready narratives and remediation roadmaps

The Result

- ✓ Campaign-level clarity, not isolated alerts
- ✓ Business-aligned risk prioritization
- ✓ Faster investigation and remediation
- ✓ Board-ready strategic insight

Powered by Doppel Digital Risk Protection

Threat Graph Intelligence operates on the same graph-driven foundation as Doppel Vision, linking attacker infrastructure across domains, social, dark web, email, telco, apps, and more to show the campaign at its root, not just the symptoms.
